ACADEMIC PROJECTS

Personal Portfolio

I designed and developed a dynamic portfolio website as a project to showcase my skills as well as my achievements. The website was created using HTML, CSS, and JavaScript. With a sleek and modern design, the website features a responsive layout, ensuring optimal viewing on various devices. It includes a navigation bar for easy access to different sections, such as Home, About Me, Past Academics, and Contact Me. The website highlights my proficiency in programming languages such as Python, C, C++, HTML, CSS, and JavaScript, demonstrating my ability to apply these languages effectively. Additionally, the website incorporates interactive elements and a visually appealing interface, enhancing user engagement. Through this project, I successfully demonstrated my command over web development, showcasing my technical skills and creativity.
